01 Post Rotterdam

ANIRED Group is proud to contribute to the iconic Post Rotterdam Project, a landmark development that blends historic preservation with modern architectural innovation.

As a specialized installation subcontractor, we are responsible for the precise and efficient installation of **Glass Fiber Reinforced Concrete (GFRC) elements**, including **arches, fascias, columns, and soffits**, as well as the seamless execution of **unitized** panel installation.

Our team's expertise ensures that these critical components are installed with the highest standards of craftsmanship, aligning with the project's vision of combining aesthetic excellence with structural integrity. ANIRED Group's commitment to quality, safety, and timely delivery plays a pivotal role in bringing this transformative landmark project to life, enhancing Rotterdam's skyline while preserving its historical essence.

02

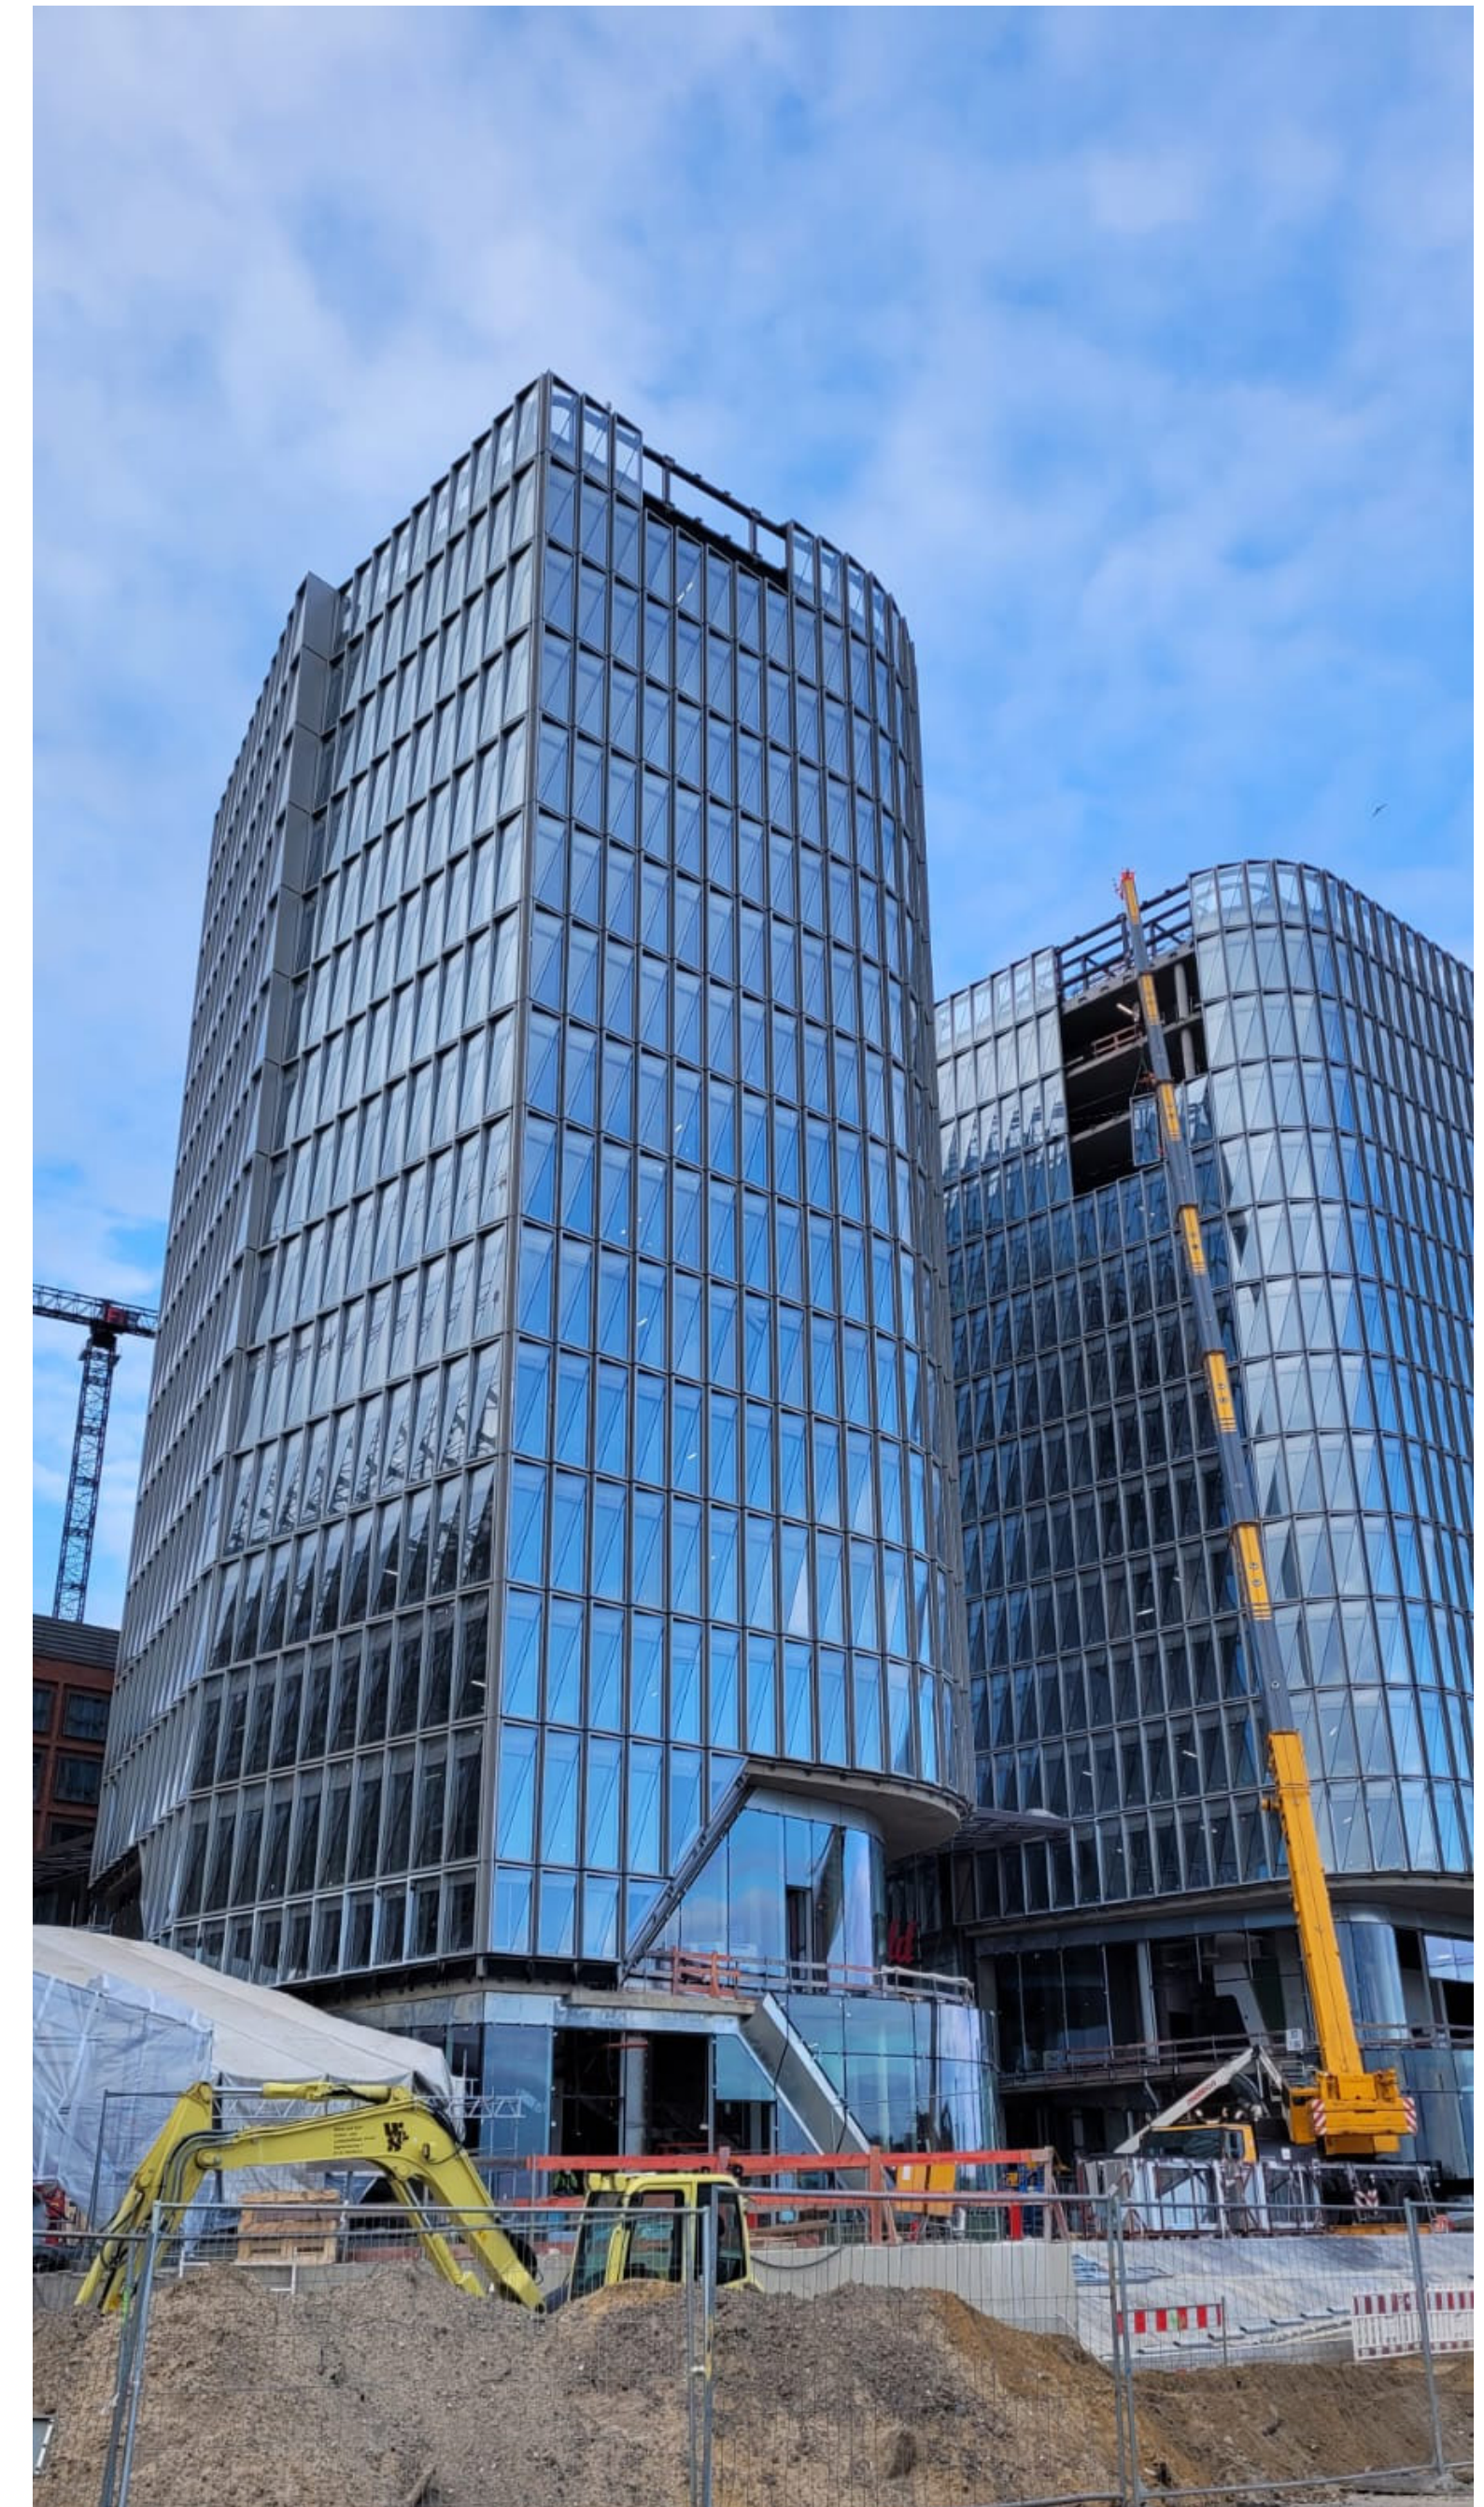

Westfield Hamburg

ANIRED Group is proud to have played a key role in the façade installation works for the prestigious Westfield Hamburg-Überseequartier, one of the largest and most ambitious mixed-use developments in northern Germany.

As a specialized subcontractor, our scope involved the precise installation of complex curtain wall systems, structural glazing, and unitized façade panels across the project's distinctive curved glass towers. The façade features dynamic geometry and highly reflective glass elements that required meticulous alignment, advanced lifting coordination, and close collaboration with other trades.

This project reflects ANIRED Group's expertise in managing high-volume façade execution on large-scale urban developments, where performance, precision, and design integrity are critical. Our commitment to excellence in engineering, logistics, and safety ensured the successful delivery of this architecturally demanding and high-profile landmark.

Through this contribution, ANIRED continues to help shape Europe's architectural future, combining cutting-edge materials with sustainable construction practices.

03

Chancellerie Brussels

ANIRED Group is proud to have contributed to the Chancellerie Project in Brussels, a distinctive development that embodies the evolution of contemporary urban architecture within a historic European setting.

As a specialized façade subcontractor, our work encompassed the precise installation of vertical cladding systems and window framing components, carefully adapted to follow the building's dynamic curvature and architectural rhythm. This project presented unique technical challenges, requiring detailed engineering, precise alignment, and seamless integration with both new and heritage structures.

Our involvement in this project reflects ANIRED Group's ability to deliver tailored façade solutions that meet the highest architectural and structural standards. By combining innovative materials with precise execution, we support bold design intent while ensuring long-term durability and performance.

With a strong focus on quality, collaboration, and execution excellence, ANIRED Group continues to play a key role in shaping architectural landmarks across Europe—bringing innovation and integrity to every project we touch.

04 Luxembourg ICONE

ANIRED Group is proud to have contributed to the ICONE Project in Luxembourg, a forward-thinking development that reflects the city's growing reputation as a hub of innovative, sustainable architecture.

As a façade installation specialist, our team was responsible for the accurate and efficient implementation of unitized panel systems, aluminum cladding, and integrated glazing solutions. The building's distinct geometric layout required a high level of precision and coordination to ensure seamless transitions between structural elements and visual uniformity across elevations.

This project exemplifies ANIRED Group's commitment to delivering custom-engineered façade solutions that respond to both architectural ambition and long-term building performance. Our expertise in managing complex technical interfaces and high-volume installations reinforces our position as a trusted partner in premium construction projects across Europe.

Driven by quality, collaboration, and a deep understanding of façade engineering, ANIRED Group continues to support iconic developments like ICONE — where modern design meets lasting functionality.

05

BNP Paribas Fortis Brussel

ANIRED Group is proud to have taken part in the BNP Paribas Fortis Headquarters project in Brussels, a benchmark development that reflects the future of sustainable and functional corporate architecture in the heart of Europe.

As a specialized façade subcontractor, our mission involved the meticulous installation of curved cladding elements and high-performance façade systems that follow the building's fluid, organic design. This complex geometry required precision engineering, advanced coordination, and a commitment to technical excellence.

ANIRED Group's role in this project highlights our capacity to deliver high-quality façade solutions tailored to ambitious architectural visions. By aligning cutting-edge materials with demanding project standards, we help transform architectural concepts into long-lasting, functional realities.

Our dedication to quality, safety, and efficient execution ensures that the result meets the highest expectations, contributing to a landmark that redefines corporate space while emphasizing environmental responsibility and aesthetic innovation.
